

Pekal

(0-12-28)

Liquid fertilizer for extra phosphate
and potash supply

COMPOSITION: % w/w

Available Phosphorus(P ₂ O ₅) :	12
Available Potassium (K ₂ O):	28

E.U. Origin

RATES: Use 2-3Lt/ton of water for foliar sprays or 20-50Lt/hectare for soil applications.

RECOMMENDED CROPS:

- **Tomatoes-peppers-cucumber:** Apply 2-4 times at 15 days intervals after the first fruits have set either as a foliar spray, or mainly in the irrigation water.
- **Tobacco:** Make a spray 2 months after transplanting. Repeat 2-3 times at 15-20 days intervals, either as a foliar or a root application.
- **Sugar beets- beets:** Make 2-4 foliar sprays from June to August at regular intervals.
- **Alpha-alpha:** Apply after each cut. It is necessary when repeated foliage harvests are made.
- **Cotton:** Spray 2-3 times after the first capsules have formed.
- **Potato:** Apply 2-4 times at 15 days intervals when potato formation starts in the soil.
- **Citrus trees:** Apply in summer 2-3 times before the fruits reach to maturity.
- **Fruit trees- Grapes:** Apply 2 - 3 times, at fruit set and in the first fruit-growing period before "veraison".

COMPATIBILITY: PEKAL is compatible with most agrochemicals for foliar sprays. Avoid combination with STABOLIN 2 (Ca).

SHAKE THE BOTTLE BEFORE USE

PRECAUTIONS: Keep out of reach of children. Keep away of foodstuffs

STORAGE: Stored in room temperature the product remains stable for more than 3 years. Keep in original package.

CONTENTS: 5 12 18 20 Lt
